Study Abroad Risk Management Solutions

INDISPENSIBLE TOOLS FOR STUDY ABROAD

SAFEY is a proactive global mobile-based warning, SOS, communication, & GPS location system that allows you to protect and communicate with study abroad students and faculty. SAFEY enables risk management officers to keep your students & faculty safe and well informed wherever and whenever they travel abroad. Installation is quick and the interface is instantly familiar. Accounts can be created and ready to use in just 2 business days.

SAFEY App for iPhone & Android
The SAFEY app provides real-time warnings, alerts and information and one-click calls local SOS emergency services. The app uses GPS to identify the student's current location and send local alerts and security information about attacks disasters, travel disruptions or other threats. Local office or program specific information can be directly linked to individual study abroad students or specific countries.

SAFEY's Instant Security Overview (ISO)
The web-based ISO links to the students' SAFEY app and allows your central and local risk management teams to locate and urgently communicate with faculty and students anywhere in the world. Send a high priority SMS from any location to keep individual students informed and secure in their travels. See relevant real-time alerts for all countries where you have students and customize country data all through the ISO.

STUDENT SAFETY ABROAD FOR THE 21st CENTURY

For Students
- Global alerts, warnings and crisis management tools with expert advice based on student's GPS location
- SOS button that populates with local emergency numbers based on students' location
- Increased student confidence and awareness while abroad to maximize the study abroad experience

For Administrators & Faculty/Staff
- The SAFEY app uses world leading GPS location and communication technology to provide valuable real-time warnings and information about disasters and other threats as they emerge.
- The Instant Security Overview (ISO) provides real-time location and communication with all your students globally in seconds.
- Save time and resources for your staff and faculty by taking away tedious manual travel booking, registration and/or reporting procedures

For Parents
- Parents feel more comfortable choosing your program abroad because you have the most advanced risk management tools and technology on the market, providing your program a competitive advantage.
- Peace of mind sending their child abroad and knowing they have SAFEY at their fingertips

CASE STUDIES

Paris Attacks November 2015

On November 13th 2015, several establishments in Paris were attacked by a coordinated series of terrorist attacks. All SAFEY app users that visit France are automatically notified and informed by the SAFEY app upon arrival that France is a risk area for attacks of this kind.. The first local news that emerged of the Paris attacks were picked up by the SAFEY service information systems and within minutes all app users in France had received processed SMS warnings regarding the attack including professional advice on what to do as the attack and tragedy were unfolding.

Japan Tsunami March 2011 "47 Minutes"

Three travelers in the Tokyo metropolitan area using the SAFEY service received the Red Alert of the tsunami warning at 14:49 JST, 47 minutes before it hit the shore, allowing them to start making preparations and closely following developments.

WHAT OUR CUSTOMERS ARE SAYING

Travel and Risk Management Security Manager

"Before we used to have students fill out a form when they traveled abroad on weekends and holidays. We couldn't keep track of more than 20-30% of all the travel because often students didn't notify us or changed their travel plans last minute. SAFEY gives us reliable and precise details of each student's location and allows us to communicate with specific groups of students as needed. Students get the important just-in-time alerts and warnings about their location as well as a location based SOS button. When something does happen, I want a pro-active solution with real-time information and precise location. SAFEY provides that for us."

Study Abroad Student

"The SAFEY app makes me feel safe. It is like I've got a companion with me on the trip that looks after me and that I can turn to. Just to get a welcome SMS with useful info and advice when I arrive in an unfamiliar country makes me, as a woman, feel safer."

Risk Management Health & Safety Officer

"I can't keep track of every student at all times and I can't keep track of everything that goes on in the world. With SAFEY I get a notification SMS when something happens and immediate information on which students and faculty I have on location. All information and positioning is delivered to me automatically."
